

GET THE LEAD OUT

THE PROCESS OF

Cleaning a faucet areator

If your faucet has an aerator that you can take off, follow these easy steps:

- Place a rag in the sink drain in case you drop any pieces.

1

2

- If you need to use a wrench or pliers, wrap masking tape around the tips of the wrench or pliers, or on the aerator. Using tape will keep you from scratching the aerator.

- Unscrew aerator.

3

4

- Separate each part-aerator housing, aerator and rubber washer

- Remove small bits on the screen and other parts.

5

6

- Soak the parts in white vinegar for a few minutes.

- Scrub them with a brush.

7

8

- If the aerator and rubber washer are in poor condition, replace them.

- Put the aerator parts back together.

9

10

- Screw the aerator back onto the faucet.

- Repeat these steps for all faucets.

11

What you may need: Rag, Masking Tape, Wrench or Pliers, Old Toothbrush. White Vinegar, Small Plastic Tub, Extra Aerators, Extra Washers.
