

CLEAR ENERGY SOLUTIONS- RESIDENTIAL REC PROGRAM

- Wanting to add renewable energy to your home?
- Don't want to purchase solar panels and worry about the costs associated with solar and maintenance or it's simply not an option at your home?
- Do you rent your residence but want to support renewable energy efforts?

Supporting renewable energy with relatively little out of pocket cost never seemed easier with NUPU's new program- Clear Energy Solutions - Residential REC Program

We all want to help protect the environment. The good news is that 25% of the electricity you purchased from NUPU is from clean energy resources that do not produce greenhouse gases such as carbon dioxide, or other pollutants. The majority of our clean energy comes from wind. However, many people want to do even more! That's why we offer a residential and business REC program within Clear Energy Solutions, which allows us and our customers to support the development of additional renewable energy resources.

Here's how Clear Energy Solutions REC Program works: New Ulm Public Utilities purchases Renewable Energy Certificates, or RECs, on behalf of our participating customers. (RECs are proof that electricity was generated by qualifying clean, renewable facilities – such as wind and solar farms – and fed into the electric grid.) When you enroll, REC purchases will offset the portion of your energy that comes from fossil fuels, making your electric usage, in effect, 100% clean and carbon-free!

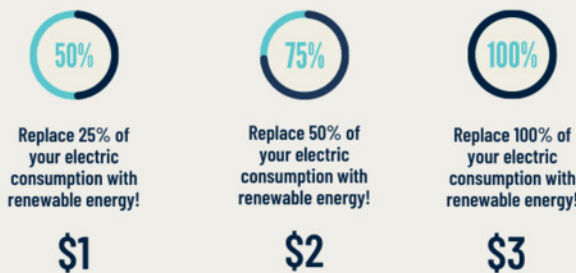

You can select to replace 50, 75 or 100% of your electric consumption with renewable energy. Because NUPU already purchases 25% renewable energy for their customers, you would only purchase energy above that amount.

OPT-IN WITH CLEAR ENERGY SOLUTIONS:

Fill out and return the Clear Energy Solutions-Residential REC Program opt-in portion of this brochure to NUPU at 310 1st North, New Ulm, MN 56073.

The amount chosen is a surcharge on your electric bill in monthly increments. Registration is May 1 - June 1 for the 2023 program which ends December 31. Your participation in Clear Energy Solutions will automatically renew on January 1 each year, but can be canceled at any time by contacting NUPU or by completing a form available on our website.

Prices for RECs can vary each year. This program is automatically renewed (Jan 1st) on a yearly basis and prices may be adjusted to reflect the cost of a REC.

The community REC program offers three opportunities to obtain renewable energy.

NUPU already purchases 25% renewable energy for their customers, a customer would only purchase energy above that amount.

Sign me up for Clear Energy Solutions REC program so I can support clean energy and protect the environment!
